

# Newborn Sessions

The first year of your baby's life is amazing, weeks go by fast as you watch their personalities emerge, and those innocent smiles on their faces forming are our most precious memories. Photos preserve the milestones of your little ones development.

Bare skin is my favorite way to photograph babies. You're welcome to bring anything special you wish to incorporate in your photos. I have several wraps, hats and diaper covers as well as many other accessories available to use. I suggest to parents that scheduling the newborn session within the first 10 days of the baby's birth, the baby is still very sleepy, easy going, and it makes it easier to capture a variety of poses for your newborns first photo shoot.

Parents may choose to be in some of the photos. If you want a pose where just your arms or hands show, it is best to wear a solid white or black long sleeved shirt. Mom may also wish to bring a tube top if she would like a bare shoulder baby look.

Older siblings are welcome in photos as well. Make sure everyone is well rested, and well fed. Children can sense stressful energy and often react against it. Relax and enjoy, there are no worries! Captured Moments by Christina is a home based studio, suited to make you and your baby comfortable. There is plenty of time scheduled for each session so baby can be changed, fed or napped as needed, we are on their time!

I offer a variety of plans, to help you capture all of the wonderful stages of your baby's first year. Please feel free to contact me if you have any questions regarding your newborn sessions.
