

# Props are Good

Props define what you are all about; your and hobbies. Hats, sunglasses, lettermans jackets, sport equipment, etc, can add to your session and define who your child is. This session is about celebrating their achievements and who they are as a young adult. If you have any reservations call for a consultation. We can help guide you through.

## Hair

Avoid radically changing your hair before your session. Haircuts should be done a week before your session to look their best. If you color your hair, don't forget your roots.

Highlights should be touched up 2 weeks prior to your appointment. Quick hair changes during your session are great, but make it easy and fast or you lose valuable camera time.

## Tanning

Do not over-do the tanning bed or sun. A three day rest from tanning is recommended before your session.

## Make Up

Rule of thumb, go with your normal day time look to start with, you can always add a little more when you get to the studio, but it's hard to take off and have to start over.

Be especially careful when applying eyeliner and mascara – the camera magnifies clumps and heavy-handed applications if it is not applied perfectly.

Summer shine can be controlled by using translucent powder that knocks out shine without adding color. Be sure to bring lipgloss!

*We offer Makeup application for an additional fee. Must be Pre scheduled to ensure enough time for pictures.*

## Be sure to bring:

Hairbrush and/or comb • Hairspray and hair accessories like bobby pins, barrettes, or headbands • Makeup • at least 2 outfits • Hats, Sunglasses, props •
